STUDY SUMMARY

Importance of a Thorough Screening at Index Endoscopy

Conclusion: Diagnoses of BE and EAC are being missed at index endoscopy, despite technological advances. Though BE is a slow progressing disease, early diagnosis is being missed entirely.

Real-Time Diagnosis of BE with pCLE

SURGICAL ENDOSCOPY

May 15, 2019

Conclusion: The addition of pCLE resulted in increased detection of BE in patients that would otherwise not have been identified. The combination of HD-WLE/ NBI and pCLE did not miss any patients with BE.
